

Digos Job Board: Strategy & UI Infographic

Synthesizing Local Pain Points with Modern UI/UX Solutions

1. The Local Hiring Problem

- The 'Black Hole': Rampant ghosting & zero status updates.
- Missing Context: Standard boards ignore trike routes & barangay specifics.
- 'How Po?' Dilemma: Facebook groups are chaotic and unfilterable.

2. Digos-First Feature Solutions

Hyperlocal Commute Tags

Search by Barangay. Tags like '1 trike ride from Gaisano' or 'Walk from Market'.

Verified Local Employer Badges

Scam-shield verification cross-referenced with City Hall business permits.

3. UI/UX Paradigm Shifts Explored

Five radical concepts were explored to break the 'job graveyard' look:

- A. Interactive Commute Map: Spatial browsing like Airbnb.
- B. Rapid Swipe Deck: High engagement mobile micro-cards like Tinder.
- C. Editorial Bento Grid: Curated lifestyle magazine layout (Apple-style).
- D. Power-User Console: Sleek, high-density tabular data (Linear-style).
- E. Master-Detail Split Pane: Zero page-reloads dual workspace (Slack-style).

★ Final UI Decision: The Master-Detail Split Pane

Provides a lightning-fast, desktop-app feel that respects user time and screen space.
